July 24, 2008 - BEGA/US is pleased to introduce their new light building element for linear fluorescent lamps designed for the illumination and delineation of interior and exterior spaces. Ideal settings would include: open landscape areas, pedestrian malls and walkways, plazas, and entrances. A feature unique to this product is the rectangular shape with an adjustable rectangular enclosure (0° or 10° tilt from horizontal) to provide a more forward throw distribution when required.

Type-II distribution. Extruded aluminum post with die-cast aluminum end caps and support pieces. Clear safety glass and anodized aluminum reflector. Available in five standard BEGA colors: Black (BLK), White (WHT), Bronze (BRZ), Silver (SLV), Eurocoat (URO). Custom colors supplied on special order.

U.L. listed, suitable for wet locations. Protection class: IP 65. Fluorescent lamp holders are type 2G11. Ballasts are electronic universal voltage, 120 V through 277 V. Protection class: IP 65
